**NANO-STRUCTURED METAL CARBON COMPOSITE FOR ELECTRODE CATALYST OF  
FUEL CELL AND PROCESS FOR PREPARATION THEREOF**

Examiner: Adam Arciero      S.N. 10/562,041      Art Unit 1795      September 30, 2009

***Election/Restrictions***

1.      Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-9 and 22, drawn to a nano-structured metal-carbon composite for an electrode catalyst of a fuel cell.

Group II, claims 10-13, drawn to a fuel cell comprising a nano-structured metal-carbon composite adopted as a cathode.

Group III, claims 14-21, drawn to a process for preparing a nano-structured metal-carbon composite for an electrode catalyst of a fuel cell.

2.      The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I lacks unity with Group II because Group I requires a nano-structured metal-carbon composite for an electrode catalyst of a fuel cell wherein Group II requires a fuel cell comprising a nano-structured metal-carbon composite adopted as a cathode. Groups I and II both lack unity with Group III, because Group III requires process steps such as preparing a nano template and carbonizing the resultant reacted mixture of a nano template impregnated with metal in carbon, said process steps are not required in Groups I and II.

3.      Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named

inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

5. A telephone call was made to Brian Batzli on September 30, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.
